Estimated return	9 pm
Cost	£12
Equipment	Well worn-in walking boots, waterproofs, warm clothing
Meals	Pack your own lunch, bring cash for a pub dinner

The Jurassic Coast covers a long stretch of coastline between East Devon and Dorset in the South of England. Designated as England's first natural World Heritage Site in 2001, it has a rich variety of landscapes characterised by rocks along the coast that have been carved by the sea into bays, cliffs, beaches and arches. It is also a haven for Earth Sciences enthusiasts and fossil collectors with its geological history dating back to 185 million years ago. Expect some ascents/descents and ~16km walk.
